

POS & self-checkout hardware cleaning guide

Touchscreens

Touchscreens can be effectively cleaned with diluted detergent or up to 70% isopropyl alcohol solution. Make sure you follow the cleaning procedure below to avoid damage to the touchscreen:

1. **Clean the screen** using a non-abrasive cloth and a diluted detergent solution, such as household soap and water. Do not apply any cleaning products directly to the screen and do not soak the cloth: wring it out before use.
2. **Dry the screen** with another soft cloth.
3. **The screen can then be further cleaned** by dampening a cloth with isopropyl alcohol solution, or using pre-packaged wipes, to wipe the screen. Do not apply any cleaning products directly to the screen and do not soak the cloth: wring it out before use.

Plastic & metal surfaces

We recommend cleaning plastic and metal surfaces of the POS or self checkout with soap, water and bleach solution. Note that bleach can damage clothing.

Other devices

NCR recognizes that there are non-NCR third-party hardware devices used with our product, and we recommend following the instructions provided by those vendors.

Disinfectant products

The following US Environmental Protection Agency (EPA) recommended disinfectants, or their equivalent, are safe for use on NCR products:

- Clorox Disinfecting Wipes - **Reg. No. 5813-79**
- Clorox Healthcare Bleach Germicidal Wipes - **Reg. No. 67619-12**
- Clorox Commercial Solutions Hydrogen Peroxide Cleaner Disinfectant Wipes - **Reg. No. 67619-25**
- Lonza Disinfectant Wipes - **Reg. No. 6836-313**
- Lysol Brand Clean & Fresh Multi Surface Cleaner (20% cleaner solution to water ratio) - **Reg. No. 777-89**
- Purell Professional Surface Disinfectant Wipes - **Reg. No. 84150-1**
- Sani-Cloth Prime Germicidal Disposable Wipes - **Reg. No. 9480-12**

Keeping your hardware sanitized is critical to consumer health always. Especially now.

70% Isopropyl Alcohol

Proper, frequent cleaning should not impact the life or performance of the equipment

Leave the system powered on if you are cleaning surfaces that are touched during normal business operations

Surfaces that are not normally touched during regular operations, we recommend that you power down the machine

Cleaning DO's

DO use a microfiber cleaning cloth or cloth towel

DO spray the cleaner onto a cleaning cloth or cloth towel and then wipe the surface to be cleaned

DO clean with a cloth or towel that is damp but not soaked

DO consult trained service personnel for cleaning of the interior of electronic equipment

Cleaning DONT's

DO NOT spray cleaners directly onto equipment

DO NOT use abrasive cleaners (powders) or abrasive cleaning materials (scrub brush, scouring pad, etc.)

DO NOT soak the electronic equipment with cleaning liquid
