

Better serve small businesses with **automated coin deposit and dispense**

In 2020, **cash and coin circulation reached a record high**—despite the increase in digital transactions.

Value of coins in circulation

\$3.8B¹
in the U.S.A.

€135B²
in the Eurozone

Automating the handling of coin transactions—whether deposit or dispense—can **significantly improve teller efficiencies** in branch.

Did you know?

2,000 a month
number of coin-based transactions handled by the average branch teller

5 to 6 minutes
average teller time it takes to process coin deposits

2x longer
coins take double the time of other routine transactions

Deposit limit
Many banks have limits to amount of coin that can be deposited during a transaction

NCR has launched new **bulk coin deposit and rolled coin dispense solutions** to help financial institutions offer self-service coin transactions at the ATM.

Deposit

- Process up to 500 coins per minute across 32 denominations
- Up to 45,000 loose coin (depends on mix)

Dispense

- Up to 550 rolls across 33 denominations
- Up to 18 roll bunch

What's new

10% **less noise**

Smaller service footprint

Enhanced coin **module cleaning**

Remote firmware updates
—no need for engineers to service

State of health indicators for **faster repair and remote intelligence**

The results?

Time consuming coin transactions **routed to self-service** from teller

Gain **48 hours** of teller time per month**

Save up to \$1,700 per teller per year

Better customer experience—no need for customers to bag their own coin

Improved security with limited teller contact with cash

Your coin processing, made **simple.**
